YELL 62

Welcome to the world of Totem Light, which begins with the idea of lighting as universal, durable and, last but not least, practical as can be.

The starting point of each project is the material, it comes first. We let it speak its own language – heavy, yet simple and honest.

The hand-polished surface of our cast brass elements is not lacquered. In this raw form it presents its beauty and strength most willingly. Brass unfolds with age, matures and, like any noble material, takes on character. We want it to undergo this natural process.

We only use natural stone: Bianco Carrara, Rosso Levanto, Rojo Alicante, Verde Guatemala and Nero Marquina.

Shades are made of opaline three-layer glass, etched to obtain a matte, velvety effect. It makes light gentle and pleasant to the user. The glass comes exclusively from Polish glassworks.

We use neither soldering nor adhesives or varnishes. Each piece is assembled by hand. Each one is a little different. It's unique.

Simplicity and universality of projects, the use of the best materials in production, unified technical solutions and only replaceable light sources ensure exceptional durability of our products. Our goal is to create long-lived items that, even after many years, can easily be fixed and restored to its original state – we believe this is the easiest and simplest way to reduce waste production.

The entire production process - from the idea to the packaging - takes place in Gdańsk, Poland. We work with local craftsmen, artists, people with extraordinary experience and knowledge of materials. We are proud of it.

Please feel welcome to join.

VARITA

Materials and Components:
polished solid brass,
hand-blown opaline, acid-etched globe,
powder coated metal rosette, fabric electrical cord

Available Colours:
bianco carrara (white) + verde guatemala (green)
bianco carrara (white) + rojo alicante (red)

Light Source (included):
G9 2,5W 200lm 3000K

YELL x TOTEM

The concept of the Yell team was to create colourful and affordable products (replacing brass by powder coated steel) at the same time holding on to the basics of totem light: simple and useful design, replaceable light sources, locally made.

Enjoy the colour!
